

Gynecologic Robotic Surgery

Robotic surgery is used for:

- Hysterectomies.
- Treating uterine fibroids.
- Descent of pelvic organs.
- Ovarian cysts.
- Endometriosis.
- Infertility conditions.

Robotic surgery offers better precision, reduced pain after surgery and shorter recovery times.

Learn the latest from **Marie-Lyne Lavoie, MD**, from Wendover OB/GYN and Infertility, and **Sandra Rivard, MD**, from Central Carolina Obstetrics and Gynecology, PA.

Wednesday, Jan. 9

6:30 - 7:30 p.m.
